+628158344080 | zuldanfahrizalr@gmail.com | https://www.linkedin.com/in/zuldan-fahrizal-rahman-8a405a325/
Serang Baru, Kab. Bekasi, Jawa Barat, 17334

Highly motivated 20 years old Informatics student at President University with a strong foundational knowledge in software development, cybersecurity, and digital forensics. Possesses hands-on project experience in mobile programming and backend development using technologies such as Java, Android Studio, Firebase, and Node.js. Proven ability to balance rigorous academic tasks with active organizational involvement in PUMA Informatics, demonstrating strong transferable skills in technical problem-solving, team collaboration via Agile platforms, and effective professional communication.

## Education Level

**President University** - Cikarang, Indonesia — Aug 2024 - Aug 2027 (Expected)

*Bachelor of Informatics, 3.70/4.00*

- Awarded Best Concept at the Economic Survival Exhibition for innovative digital project execution
- Served as Board of Directors (BoD) in the Secretariat division of PUMA Informatics, managing institutional documentation and cross-departmental coordination.

## Work Experiences

**PT. Wirajaya Erkon Mandiri** - South Tambun — Jan 2023 - Apr 2023

*Helper*

- Executed preventative maintenance routines for 30+ industrial AC units to guarantee continuous climate control functionality.
- Diagnosed electrical circuit faults utilizing specialized hardware tools, reducing system downtime across client facilities by 15%.
- Maintained detailed technical service logs to facilitate accurate client reporting and streamline team troubleshooting processes.

## Organisational Experience

**PUMA Informatics** - Cikarang, Indonesia — Oct 2024 - Jul 2026

*Secretaries*

- Spearheaded administrative workflows as a Board of Directors member, managing critical institutional documentation and proposals.
- Managed and archived 50+ official organizational documents, letters, and proposals to maintain operational transparency.
- Recorded and distributed concise minutes of meetings for internal evaluations to track action items and organizational milestones.

**OilCycle Social Project** - Bekasi, Indonesia — Jun 2025 - Jul 2025

*Secretary*

- Managed comprehensive administrative structures and proposal adjustments for the community-focused OilCycle initiative.
- Coordinated cross-functional communication pathways and internal scheduling alignment to optimize volunteer mobilization timelines.

## Achievements & Other Experience

- **Mobile Application** (2025): Developed a functional Android application using Java within Android Studio and integrated Firebase as a real-time cloud database to manage user authentication and dynamic data streams seamlessly.
- **Trust Your Friends? — IoT and Web Game** (2025): Designed a two-player interactive bomb-defusal game merging physical IoT hardware with a Laravel-powered web framework, utilizing MQTT protocols to establish real-time data synchronization.
- **Project HUE — Game Development** (2025): Built a fast-paced, third-person shooter game featuring a striking anime-cel-shaded art style, implementing complex game mechanics to deliver dynamic combat systems and fluid character movements.
- **3D Modeling & Motion Graphics Project** (2025): Designed and rendered high-quality 3D assets and environments utilizing Blender, implementing 3D camera tracking and motion solving techniques to seamlessly integrate simulated elements with digital video layouts.
- **Capture The Flag (CTF) Participant** (2025)**:** Engaged in competitive cybersecurity challenges, applying practical knowledge in ethical hacking, web vulnerabilities, and digital forensics to solve complex security scenarios
- **Roblox Interactive Game Environments** (2025): Engineered interactive digital environments and multi-player gameplay mechanics within the Roblox Studio ecosystem, utilizing Lua scripting to handle user authentication, event triggers, and real-time player data states.
- **2nd Place Winner — Economic Survival Exhibition** (2025): Secured 2nd Place at the exhibition by showcasing two distinct games: a fast-paced 3D anime-style game and a web-based interactive IoT game, proving high versatility in both software engineering and hardware integration.

## Skills

- Ethical Hacking
- Web Development
- Android Development
- Digital Forensic
- User Interface
